

HighBackSling

SystemRoMedic™

Trial Fitting Protocol

Patient's name: _____

Social insurance number: _____

HighBackSling is easy for the caregiver to apply and it gives the patient a feeling of security. It features leg sections, which means that the patient does not sit on the sling. Instead, the sling provides support from the tailbone up over the head and under the legs. HighBackSling is designed for situations requiring extra support and can be used for lifting from a recumbent position on the floor.

Functional inspection

Visual and mechanical inspection

Check the condition and function of the sling regularly. Always inspect the product after laundering. Check to ensure that seams and material are free from damage. Check to ensure that fabric is not worn or faded. Apply load to the device and check to ensure that clasps, handles, etc. withstand heavy load. If there are signs of wear, the product must be discarded.

Which size is used?

XX-Small X-Small Small Medium Large X-Large XX-Large

Which material is used?

Polyester Polyester net Plasticized net

Accessories

SoftLegSupport AdjustmentLoop StrapsPadding

Which slingbar is used?

Leg support placement:

Crossed

Overlapped

Each leg separate

SystemRoMedic™ is a complete solution for easy transfers.
The concept encompasses four product areas that meet
most needs in different transfer situations.

Transfer, between two locations. **Positioning**, within the same location.
Support, for mobility. **Lifting**, both manual and mechanical.
